> COMPLETION OF BRIDGE ACROSS COLORADO RIVER CAUSE FOR REJOICING

The completion of the big steel raiload bridge across the Colorado river at Parker is an event of decided importance to Wickenburg, says the Wickenburg Miner. It means a long forward step in the movement which will culminate in the creation of a new trans-con tinental trunk line on which Wickenburg, in view of its advantages of location and water supply, is almost certain

to become a division point.

The new bridge is 1,425 feet long, being divided into five spans of 285 feet each. The piers are of concrete resting on the bedrock nearly a hundred feet below the river's low water mark. The track is thirty-five feet above the water at its highest stage. The approach on the west side is nearly completed and it is believed that the work of pushing the grade through to its California terminus at Barstow will be resumed at the close of the hot weather season.

Notice to Water Users. Owing to the unnecessary waste of water by sprinkling, the hours for sprinkling will be reduced to two hours day, from 7 to 8 o'clock in the morn-

ing and 6 to 7 o'clock in the evening For any violation of this rule the supply will be turned off and not turned on again until a sprinkling charge is paid.
